

# SAPPHIRE TUNGSTEN SQ48

**SQ48** is a state of the art patent pending formulation uniquely designed for the jewelry industry, incorporating the best functional qualities of a perfectly balanced blend of various alternative metals with gemstone sapphire crystal for the touch and feel of platinum metal wedding bands.

**SQ48** truly differentiates itself from the others because it has the capacity to be inner forged with other metals to create 2 and 3-dimensional looks without shattering. This allows for an outer ring of SQ48 and an inner ring of endless options including silver, gold, platinum, etc.
